# The Start Of The Journey

# Key Drivers Behind

## Agility

Select your network validation platform of choice. Choose a topology in your premise or rent one from Cisco

Outcome  
Faster Time  
to Market

33%

## Quality

Select the network application and features used in your deployment or simply upload your router config to CQE

Outcome  
Better  
Quality

30%

## Cost

CQE automatically builds a CD pipeline for your deployment. Start the pipeline and get the deployment score in few hours!

Outcome  
Reduce  
Certification  
Costs

35%

10k+

Test-cases  
available

35+

Automation  
Packages

6

IOS-XR Platforms  
Supported

500+

Daily Active  
Test Runs

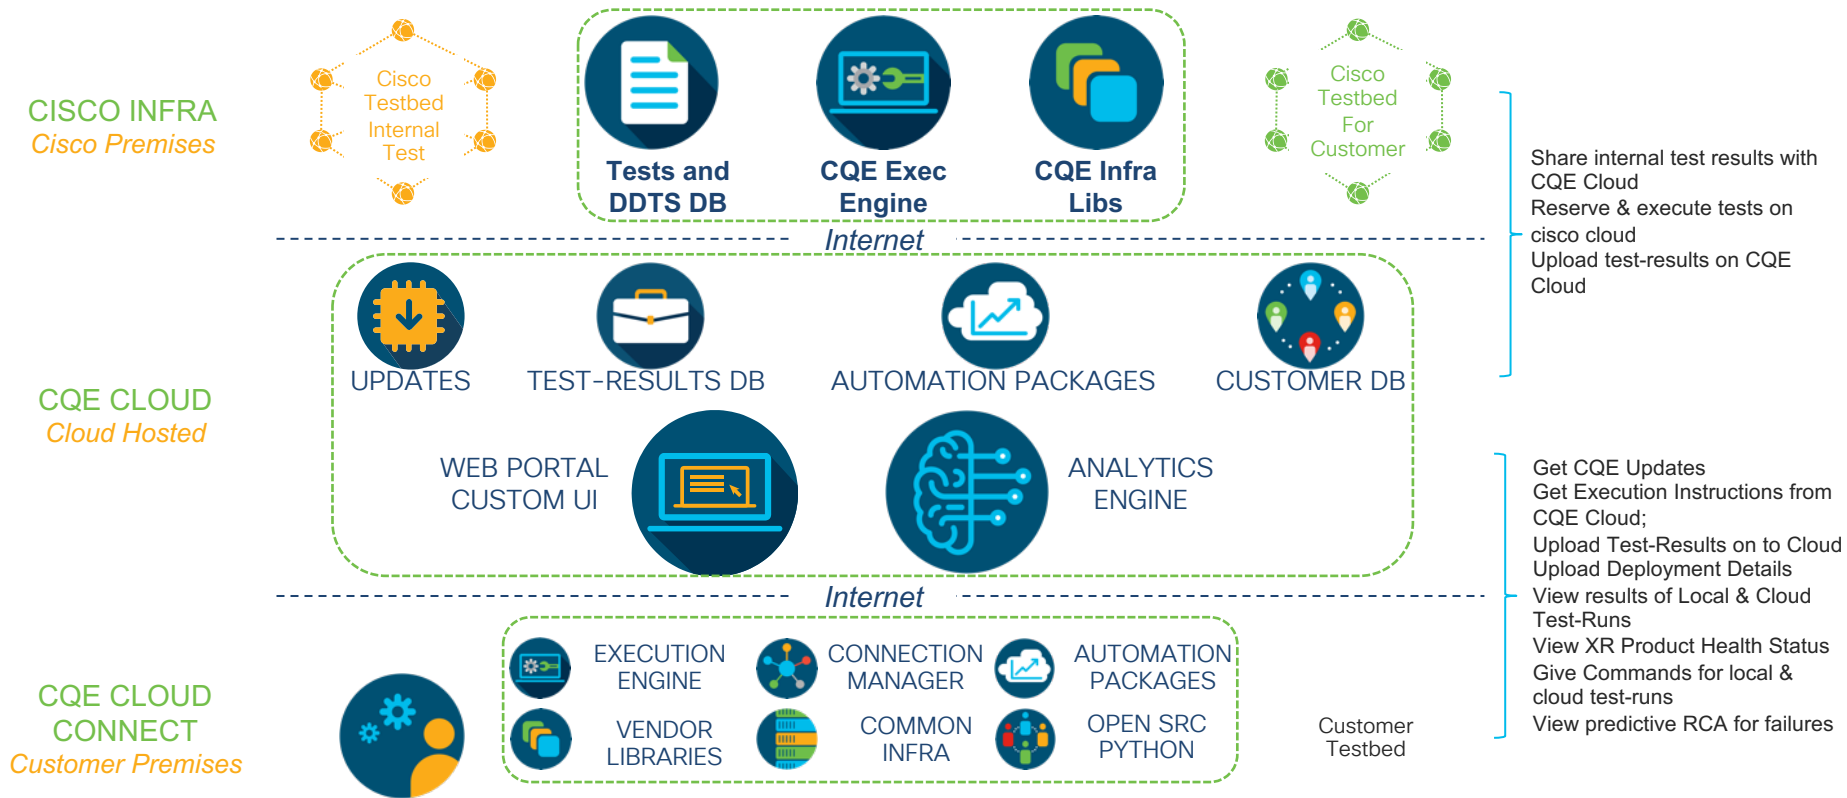

60%+

One-click Test  
Coverage

500+

Active Engineers  
Adopted

# CQE Deployment

# CQE Building Blocks

## ***Automation Packages***

Focus on faster deployment and insertion by leveraging existing suites on current and next-gen Platforms

## ***Qualification Kit***

If CQE's pre-loaded Automation Packages don't fit the bill, build your own testcases with CQE's powerful Python automation framework. CQE KIT is built to handle the whole test automation lifecycle, with libraries for device connection, traffic generator handling, features, logging, reporting, and more.

## ***Smart Debug***

CQE Smarts stimulates faster failure analysis of Automation Package runs, provides insights into all devices events, finds bugs for you and more. It has you covered.
